Back

Detail

The PANTOSCREEN WITH CASING screen is equipped with a housing and a pantograph mechanism at the back.

- 17/17cm square section aluminium casing and double frame tube, colour: white, RAL 9003
- Black-out matt white fabric, black borders
- The pantograph system offers a good flatness of the projection surface
- The top bar closes the casing when the screen is retracted and is equipped with an integrated screen surface equalization mechanism
- An equalization mechanism for the angle of inclination of the pantographs ensures that the pantographs are parallel on the back when descending or climbing the screen and prevents twisting.
- Safety stop of the winding mechanism when the housing is closed
- Up/down switch included
- Option: roller feet
